

I'm really saddened to learn that Sinclair Broadcasting has decided to force their stations to air an anti-Kerry documentary days before the election.

Television broadcasters are obligated to serve the public interest, not to promote one-sided political agendas. I read that Sinclair stations reach about 24% of American households, so this abuse is magnified over a large scale.

Please use FCC regulatory power to prevent this broadcaster's abuse of power. This is exactly the purpose of regulation - to enforce equal access and fair use of public airwaves.

Thank you.
